

I wish to register my support for the continuation of the current Indiana telephone privacy law. Since its inception, we have enjoyed an almost total elimination of unwanted telemarketing calls to our home. We do not desire to see this law weakened in any way. We do not desire to return to the days of continuous invasion of our privacy by telemarketers, which we experienced prior to the privacy law being enacted (on average, we used to receive at least 10-12 such calls per week.) Please retain the current level of protection which we now have.
